SUMMARY

Full Stack Developer with 3+ years of experience shipping resilient web platforms for fintech, automotive, and marketing clients. Blend of frontend excellence (React.js, Next.js, modern UX) and backend depth (Node.js, microservices, distributed caching) to deliver performant, reliable, and secure experiences. Known for translating business goals into scalable architecture, optimizing delivery pipelines, and collaborating across product, design, and data teams in high-velocity Agile environments.

CORE COMPETENCIES

- Product-minded engineering · Scalable architecture · REST/GraphQL API design · Data modeling · caching · Performance tuning · observability · Secure integrations (payments, CRM, messaging) · Agile/Scrum leadership · Stakeholder communication

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, PHP, SQL

Frontend: React.js, Next.js (SSR/ISR/SSG), Redux, React Hooks, Context API, Tailwind CSS, Material UI, Bootstrap, GSAP, Framer Motion, Responsive Web Apps

Backend: Node.js, Express.js, RESTful APIs, GraphQL, Socket.io, Microservices, Server-Side Rendering

Data: MySQL, MongoDB, PostgreSQL, Redis, Data Modeling, Query Optimization, NoSQL

DevOps/Tools: Git, GitHub, Postman, VS Code, Vercel, Cloud Deployment, CI/CD, Agile/Scrum, SDLC

WORK EXPERIENCE

Phoenix Advance Software Pvt. Ltd.

Full Stack Developer

Jaipur

SEP 2022 - JUN 2025

- Owned full-stack delivery for automotive, finance, and marketing SaaS products, crafting modular React/Next.js frontends and Node.js services that cut load times 35% and lifted engagement 28%.
- Led API-first initiatives connecting Razorpay, Stripe, WhatsApp Business, and CRM ecosystems; automated 60% of manual workflows and shrank processing time by 40%.
- Introduced microservices patterns with Redis caching, resilient messaging, and structured observability, sustaining 10K+ daily requests at 99.8% uptime while trimming API latency 22%.
- Championed sprint planning, backlog prioritization, and proactive incident playbooks, achieving 95% on-time delivery and reducing critical downtime by 25%.

Airsonweb Solutions Pvt.

React Developer

Ahmedabad / Remote

JAN 2022 - MAY 2022

- Delivered reusable design system components in React.js/React Native, boosting Lighthouse mobile scores from 72 to 95 and standardizing UX across web + mobile.
- Hardened REST integrations with better schema validation, logging, and retry logic, improving data reliability 18% and decreasing production API errors.

PROJECTS

V3cars – Automotive Website • [Live](#)

Tech Stack: PHP, MySQL, jQuery, Bootstrap, RESTful APIs

- Modernized automotive content pipeline with automated data ingestion, modular CMS tooling, and SEO-ready components, accelerating publishing velocity 50% and growing mobile traffic 32%.
- Refactored PHP/MySQL backend with tuned queries, connection pooling, and CDN caching to absorb seasonal traffic spikes without degrading response times.

TrackOfferz – Campaign Management Platform (Private SaaS)

Tech Stack: Next.js, Node.js, Express.js, MySQL, Redis, Tailwind CSS, RESTful APIs, Microservices

- Architected real-time campaign orchestration with Redis-backed queues, feature-flagged microservices, and observability dashboards processing 100K+ events/day at 99.9% uptime.
- Shipped RBAC-secured analytics workbench with live KPI views and scheduled exports, removing 45% of manual reporting toil and reinforcing data-governance controls.

TimesMoney – Fintech Aggregator • [Live](#)

Tech Stack: Next.js, Tailwind CSS, Material UI, Node.js, MongoDB, RESTful APIs, Server-Side Rendering

- Launched SSR-first fintech marketplace with automated schema markup, performance budgets, and accessibility gates—raising SEO score from 78 to 96 and organic reach by 40%.
- Implemented MongoDB-backed admin surfaces with PCI-aligned payment flows and realtime insights, cutting reconciliation cycles 40% while maintaining zero security incidents.

SPTSPL – Digital Marketing Showcase (Personal Project) • [Live](#)

Tech Stack: Next.js, Tailwind CSS, GSAP, Framer Motion, Server-Side Rendering

- Designed a personal marketing experience site inspired by agency layouts (hero, services grid, CTA funnels, FAQ) to refine frontend storytelling—combining GSAP/Framer Motion with responsive Tailwind theming.
- Deployed on Vercel with SSR routes, component-driven content, and performance budgets, showcasing UI craft, micro-interactions, and modern web animation techniques for portfolio reviews.

EDUCATION

Aryan College, Ajmer

Bachelor’s Degree in Computer Applications

Ajmer

JUN 2017 - DEC 2020

LEADERSHIP AWARDS

- “Robust Backend Developer” award (Phoenix Advance Software, 2024) for elevating backend architecture resiliency and API performance across flagship programs.
